APPLY TODAY AT R.LACROIX@SOILCAPITAL.COM

Call for Applications: Recruitment Specialist

Soil Capital is a dynamic and fast-growing AgTech company active in France, Belgium and the United Kingdom with a bold mission to empower farmers to commit one million hectares. to more profitable, regenerative agriculture by 2025.

Yes, one million! It's almost all the farmable land in Belgium!

To achieve this goal, Soil Capital helps farmers in their transition to regenerative agriculture and provides them with carbon payments, fresh economic insights and access to local expertise.

We need you to help us on this mission!

Features

Position:	Front-end Developer
Contract type:	Full time, permanent
Starting date:	As soon as possible
Location:	Offices in Perwez, BE

Roles & Responsibilities

As Front-end Developer, your main mission at Soil Capital will be to think, build, deliver and tweak our Web App allowing farmers to manage their farms and be eligible for carbon certificates. We are looking for a Front-end developer with a mindset to do FullStack!

Our core technological stack is React in combination with TypeScript for the Front-end and PHP/Laravel for the Backend.

You'll join a dynamic team of 4 people who have a constructive and pragmatic approach to the development challenges. We are looking for another gear for the team, meaning someone with an entrepreneurial mindset, willing to help us with a no nonsense approach to challenges and with a focus on details.

Skills, Qualifications & Attitude

- Very good knowledge of React and TypeScript.
- Very good knowledge of HTML, CSS and Javascript.
- Concrete experience of MySQL database.
- GitHub
- Concrete experience with REST APIs.
- Knowledge of Material-UI is a plus.
- Knowledge of Angular or VueJS is a plus.
- Knowledge of PHP/Laravel is a plus.
- Used to work in an Agile environment.
- Knowledge of GitHub Actions is a plus.
- Fluent in French and English.
- Basic analysis techniques (UML, diagrams, use case...)
- Analytic mind.
- Good social and communication skills.
- Be a convinced team player.
- Passion for life and the Soil Capital product.
- The desire to work in an amazing team.
- A good knowledge of Material Design is an asset.

About Soil Capital

Soil Capital is a technology-driven agronomy business with international experience since 2013 designing and executing farm transition strategies to regenerate soil health while delivering superior profitability. Over the last two years, we have developed a unique decision-support and reward platform for regenerative transitions, called mySoilCapital. It enables farmers to monetise their carbon and compare their costs through the production of a certified report of a farm's agronomic, economic and GHG performance. After a first sales cycle with French and Belgian farmers as well as food and farming businesses ranging from supermarkets to farmer cooperatives, we are now preparing for significant growth and development.

To apply

Please send your CV and cover letter explaining your suitability for the role to Renauld Lacroix (r.lacroix@soilcapital.com). Applications will close on 15 June 2021.
